Chronic wounds can cause complex medical problems, including loss of function, pain and compromised quality of life. If you have a non-healing wound, the Wound Center at Knapp Medical Center has the expertise needed to treat and help prevent recurrence of these wounds.

Individualized Wound Care

The Wound Center at Knapp Medical Center provides a thorough diagnostic examination of the wound and the patient. A comprehensive and custom treatment plan is then developed and communicated to the referring physician.

Information concerning the patient's progress is continuously submitted to the referring physician. The update even includes photos of the wound with a progress report at regular intervals. We can periodically evaluate and readjust our treatment plan as necessary to achieve a positive outcome.

Patients may not need a referral to The Wound Center at Knapp Medical Center, depending on their insurance provider.

Contact our office at (956) 969-5185 and we will be glad to let you know what steps, if any, you will need to take in order to schedule the first consultation. The Wound Center at Knapp Medical Center is open Monday through Friday, 8 a.m. - 5 p.m., and closed on weekends and holidays.
